

Ocular Mori Upright Surgical Gonio Lens

	Product Code	Gonio Image Mag	Contact OD	Lens Height	Static Gonio FOV		<p><i>Developed With:</i> Kazuhiko Mori MD, PhD Kyoto Japan.</p> <p><i>Journal Reference:</i> <i>American Journal Of</i> <i>Ophthalmology, Vol</i> <i>143, No. 1, pp 154-</i> <i>155, January 2007.</i></p>
	OMUSG	0.80x	11.5	21.5mm	110°		
	CE						

Design

- The Mori Direct View Gonio Lens is designed for glaucoma procedures, including goniosynechialysis, trabeculotomy goniotomy and trabecular stent placement.
- The two mirror design redirects the oblique Gonio image to the coaxial “cataract” surgical position, allowing the surgeon easy 360° viewing of the anterior chamber.
- Central view to observe instruments passing across anterior chamber.
- Combines the most favorable features of traditional gonio prisms while providing a properly orientated view of the angle.
- It is lightweight and directly hand held which lends itself naturally to delicate maneuvers while observing the anterior chamber angle.
- Anterior chamber charting made easier with correct image orientation.
The mirrored surfaces are silvered with an exclusive double layer, protective coating to prevent peeling and damage under normal daily use.
- Works best with coaxial light source.

Cleaning & Disinfection
